| <ul style="list-style-type: none"><li>• Developed and maintained <b>MERN stack</b> application features using <b>React.js</b>, <b>Node.js</b>, <b>Express.js</b>, <b>MongoDB</b>, <b>JavaScript</b>, and <b>RESTful APIs</b>.</li><li>• Worked on <b>Node.js asynchronous programming</b>, <b>file system operations</b>, <b>file uploads</b>, and <b>image processing</b> workflows for backend application modules.</li><li>• Participated in <b>code reviews</b>, <b>debugging</b>, <b>testing</b>, and <b>issue resolution</b> to improve <b>code quality</b>, <b>application stability</b>, and <b>maintainability</b>.</li></ul>  |                     |

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, SQL.  
**Frameworks and Libraries:** React.js, Node.js, Express.js, FastAPI, Multer, Axios, Electron.js, NLTK, Zod.  
**Databases and Tools:** MongoDB, Git, Postman, Vercel, GitHub Pages, npm.  
**Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems, Database Management Systems (DBMS), Computer Networks, Software Engineering, Software Development Life Cycle (SDLC).

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |          |
